Detail-oriented Computer Systems Engineering with expertise in web , desktop systems, and database management. Skilled in creating efficient, user-centered applications using React, TypeScript, and Express. Eager to contribute to a dynamic team while continuing to grow professionally and deliver meaningful value

## EXPERIENCE

---

### Frontend Developer at Caja popular San José de Tlajomulco Jun 2025 - Dec 2025

- Developed a responsive internal web platform using React, TypeScript, and TailwindCSS to enhance internal processes.
- Optimized user experience by implementing adaptive layouts for mobile and desktop devices using responsive design.
- Collaborated with backend developers to integrate APIs, improving system performance and reliability.

### T-SHIRT Store Jun 2025- Jul 2025

- Built a T-shirt e-commerce platform with Express, React, and TypeScript, including user authentication via JWT.
- Implemented CRUD operations using Sequelize ORM to manage product and user data efficiently.
- Improved security and user experience by designing secure login and role-based access features.

### Box Maker App Development Aug 2023- Sept 2023

- Creation of an app for android which helped calculate dimensions for creating packages for international shipping
- Delivered a functional prototype that reduced manual calculation time by 40%.
- Integrated an intuitive user interface and automated computation features to streamline logistics.

## EDUCATION

---

### Instituto Tecnológico De Ciudad Guzmán

Aug 2021 - Mar 2026

Computer Systems Engineering

GPA: 3.9

## CERTIFICATIONS

---

- SCRUM Fundamental Certificated (SFC).

Apr 19, 2024

## TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, TypeScript, SQL, Python

**Web Technologies:** HTML5, CSS, React, Node.js, TailwindCSS, Express

**Databases:** MySQL, PostgreSQL, SQL Server

**Developer tools:** Git, GitHub, VS code
